Notes:

- For specified performance, follow TIA/EIA 568-B installation guidelines.
- Jack Modules can terminate PVC or Plenum rated 22-24 AWG solid or stranded IWC cable with insulated conductor outside diameter ranging between 0.035 inch (0.88mm) and 0.048 inch (1.2mm).
- Jack Modules may be re-terminated a minimum of 10 times.
- For technical and performance information, consult Panduit Technical Support.
- MUAJC588 Jack Modules suit a standard switch mechanism pattern on various Australian faceplates.
- For Mini-Com Mini-Jack Shielded Jack Module instructions, refer to PN348*.

As with all Wiring Accessories, the following statements apply:

- Never install communications wiring during a lightning storm.
- Never install communications wiring in wet locations unless the jack is specifically designed for use in wet locations.
- Never touch uninsulated communications wiring or terminals unless the communication line has been disconnected at the network interface.
- Use caution when installing or modifying communication wiring.
