

# Keystone Shielded Jack Modules

## specifications

Category 6A/Class E<sub>A</sub>, 8-position, shielded jack module shall terminate 4-pair, 22 – 24 AWG, 100 ohm shielded twisted pair cable and shall not require use of a punchdown tool. Shielded jack modules shall use a forward motion termination method to optimize performance. The termination cap shall include a universal label coded for T568A and T568B wiring schemes. Jack shall utilize a die-cast housing. The jack wire cap shall be fully encapsulated with the housing when terminated. The Shielded Jack Module must be installed as part of the Keystone Shielded Copper Cabling System to achieve IEEE 10GBASE-T certified performance.

## applications

Keystone Shielded Jack Modules are a component of the Keystone Shielded Copper Cabling System. This end-to-end system provides a cost effective medium for ensuring that network bandwidth needs are easily met today and tomorrow. This shielded system provides, excellent EMI suppression and aids in secure data transmission. The Panduit solution helps ensure organizations efficiently and reliably meet their data transmission needs. The Keystone form factor allows for easy interoperability with other shielded solutions

designed to the keystone standard. With certified performance to the ISO 11801 Class E<sub>A</sub>, IEEE 802.3an-2006 10GBASE-T and ANSI/TIA-568.2-D Category 6A standards, this system will support high bandwidth applications with data centers and connections to high end workstations such as stacking switches and switch-to-switch links, storage area networks, aggregation of Gigabit Ethernet channels, real-time intensive financial transactions, streaming video, animation, scientific modeling and medical imaging.
